

# THE NEED PROJECT

## NATURAL DISASTERS

---

Our planet is constantly exposed to severe events that endanger the health and safety of people that The last registered in Chile was a tsunami. This caused a balance of 525 fatal victims and inmeasurable damage.

## OUR PURPOSE

**SAVE LIVES!**

---

The NEED project team offers an alternative to avoid severe damage through an intelligent system and use of satelital information, consolidating an automatic model for predict the evolution of a possible climate disaster. The project owes its acronym to Natural Events Exposure & Detection system.

## THE CHALLENGE

**BE A SYSTEM  
INTEGRATED**

---

The real idea is to create a comprehensive, coordinated system for the management of emergencies caused by these phenomena. This would be a first step to reduce the number of victims to a minimum.

*"Accurate information saves lives"*
